Robust’s Newsletter

Robust will develop an autonomous, reliable, cost-effective technology to map vast terrains, in terms of mineral and raw material contents which will aid in reducing the cost of mineral exploration, currently performed by ROVs and dedicated SSVs and crew.

Mining Cluster Event

The ROBUST project was presented during the mining cluster event organized by EASME.

Publications and Outreach

1) J. Hermsdorf, “Underwater Use of Lasers” in the International Congress on Application of Laser & Electro-Optics (ICALEO), San Diego (USA), 2017

Incoming Events

The ROBUST forth semester meeting will take place next February at ISME Headquarters in Genova.
